Mini Project 3 – Axure Prototype

Project Scenario

You have been approached by a Tuition Center XYZ Tutions. As part of their new initiative, you are asked to create a Prototype.

The tuition center has many teachers and many students. Teachers publish learning materials in a secured area.

Each student belong to one class and each teacher belong to multiple class.

The system should allow teachers to login and publish training materials. Students will be able to login and view the training materials.

Create a prototype for the home page, login page, login success page for both students and teachers. Teacher content posting page. Student content viewing page. Student Registration Page, Forget Password and Forget Password thank you pages.

Create the prototype in Axure and provide screen capture.
